The screenshot shows a Visual Studio Code window connected via SSH to a remote host (1173687 [SSH: fit-lab.vlu.edu.vn]). The Explorer sidebar on the left shows a file tree with various directories and files, including .ssh, vscode-server, Docker, iDragonCloud, and others. The main editor area displays the content of the .bash_logout file, which contains shell script code for clearing the console when the login shell exits.

```
$.bash_logout X
1 # ~/.bash_logout: executed by bash(1) when login shell exits.
2
3 # when leaving the console clear the screen to increase privacy
4
5 if [ "$SHLVL" = 1 ]; then
6     [ -x /usr/bin/clear_console ] && /usr/bin/clear_console -q
7 fi
8
```

Code: Đính kèm trong tệp.
